PM Soldier Weapons Mission

Guarantee U.S. Soldiers have an ***overmatch*** in individual and crew served weapons capabilities on present and future battlefields.

Maintain individual and crew served weapons' ***readiness*** for the Army through intensive management of the full acquisition life cycle.

Be ***immediately responsive*** to the Soldier's wartime individual and crew served weapons requirements.

Ensure interoperability with Soldier System programs to achieve the goals of the Objective Force Soldier.

Soldier Weapons Today and Tomorrow

Individual CIRCA (1963)

M4 CARBINE

M16A4 RIFLE

M16/M203

Crew Served CIRCA (1933)

MK 19 Grenade Machine Gun

M2 .50 CAL Machine gun

Individual Weapons

- 25mm Ammo High & Low Velocity
  - Airburst
  - Armor Piercin
  - Thermobaric

- 40mm Am
  - Thermobaric

XM8 Carbine

XM320 40mm Grenade Launcher

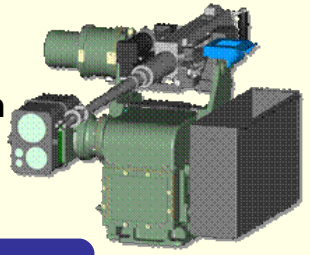
XM25 Air Burst Weapon

XM29 Integrated Airburst Weapon System

Crew Served Weapons

XM307/XM312 Advanced Crew Served Weapon

Common Remotely Operated Weapons Station (CROWS)



Lethality Leap Ahead Achievable in 24/36 Months

Advanced Crew Served Weapon

XM307

Kit Change at Unit Level (5 Parts)

XM312

- Supports FCS Block 1 Defensive Armaments
- 25mm Munitions
  - Air-bursting Munitions Defeats Defilade Targets
  - Armor Piercing Munitions Defeats Light Armor
- Day/Night/All Weather Capable Fire Control

- Supports FCS Field Evaluation
- Supports Stryker BCT Fieldings
- XM312 is a Direct Replacement For 86 Year M2
- Accelerated Program Possible w/Funding
  - Delivers Start in 12 mo - 50 Wpns in 18 mo
  - Full-rate Production Line In 24 mo

- One Weapon Replaces Two Weapons – M2 & MK19
- Dual Feed Capability
- Light Weight
  - Can be Dismounted from Platform
  - 2-man Portable (50.3 lbs) vice 128 lb M2 or 144 lb MK19
- System Dispersion 1.5 mil
- No Headspace or Timing Adjustments
- Maximum Commonality between XM307 and XM312
- Minimized Future Logistic Impact
- Capable of Remote Operations

Shoots/Handles/Maintains Like A Light Machine Gun

Advanced Crew Served Weapon Firings

Advanced Crew Served Weapon Firings

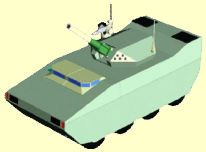
Advanced Crew Served Weapon Firings

Advanced Crew Served Weapon Firings

XM307/XM312 Potential Platforms

FCS Potential Roles

Common Close Support Weapon for:



MCS

FRMV

NLOS-C

FTTS

25mm

Replace 5 Parts

.50 Cal

- Fire on the Move with Stabilized Mount (CROWS)
- Minimal Interior Vehicle Space Claim
- Dual Feed Capability
- Capable of Remote Operations
- Dismountable
  - Light Weight – 2 Man Portable
  - Land Warrior Ready
- Smaller Logistical Footprint

One Weapon Replaces Two Weapons M2 and MK19

Other Platforms

XM29 Spiral Development

Old "Total System" Blocked Development

Block 1

Block 2

Block 3

New Spiral Development with Incremental Fielding

XM25 with Air Bursting Ammo (25mm)

XM8 Carbine

XM320 40mm Grenade Launcher

XM104 Target Acquisition Fire Control System

XM29

XM8 Future Combat Rifle

Heavy Barrel

Multiple barrels converted at unit level

Long Barrel

Compact Barrel

Accessory Shot Gun

Integrated Multifunction Sight

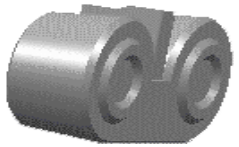
Standard Barrel

Bipod for sharpshooter variant

Quick attach forward hand grip

Quick attach 40mm (XM320)

Improved telescopic butt stock



High Capacity Magazine

Reliability Improved Magazine

Changeable lower receiver allowing conversion to 7.62mm

Modularity/Reliability/Lethality in a Lighter Pa

XM 25 Concept

XM29 Subsystem Spin Offs

High Explosive Air Bursting Ammo

Training

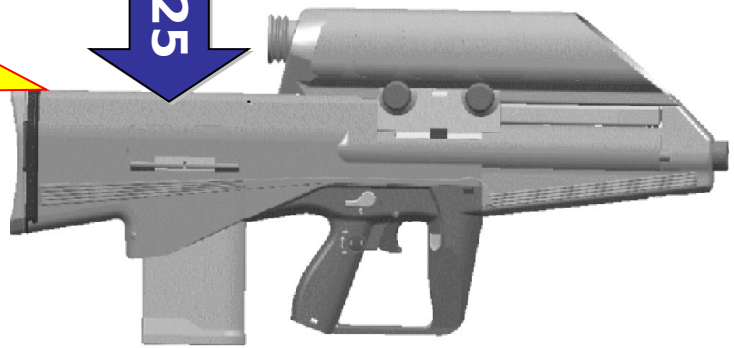
Flechette

Thermobaric

- 25mm Low Velocity Ammo

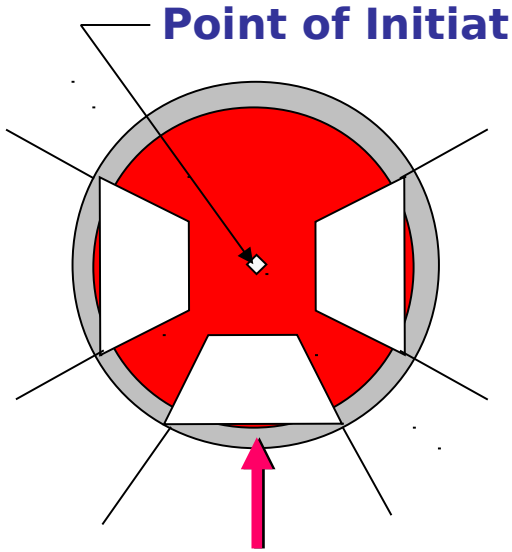
Available for Testing in FY 05

XM25



Ultra Lightweight and XM25/XM29 Thermal Capability

Thermobaric Munitions



Projectile Flight Path

- **40mm Low Velocity Rounds Deployed to Afghanistan**
- **Technology/Utility of Thermobarics Demonstrated**
- **Munitions Have Agility to Defeat a Range of Targets**
- **Pressure and Light Output Used in Combination to Defeat Enemy Vulnerabilities**

Legend
Red– 40MM Thermobaric Grenade
Ph/PK = 1
White-40MM HEDP Grenade
Ph/Pk >0.5<1.0

Operational Use
Similar to M433 HEDP
Common Warnings Apply

Thermobarics Provide Surgical

Thermobaric Munitions Suite

25mm Low Velocity

25mm High Velocity

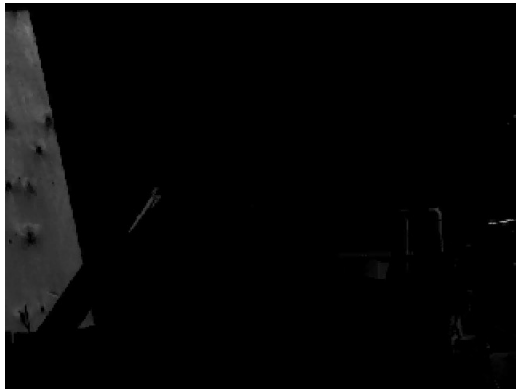
40mm Low Velocity

XM25

XM307

XM8 w/XM320

40mm TB Video



25mm TB Video

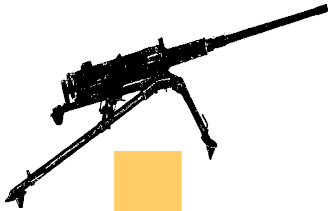
40mm TB Cave Video

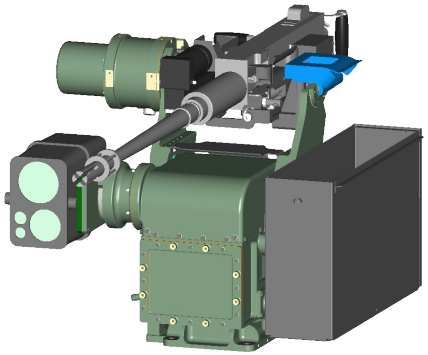
Thermobaric Munitions Firings (40mm Static)

Thermobaric Munitions Firings (25mm Static)

Thermobaric Munitions Firings (40mm Dynamic)

Common Remotely Operated Weapons Station (CROWS)





CURRENT PROGRAM STATUS

- ORD Approved 26 April 99
- Joint Program (MP School/USAF)
- Engineering Assessments On-going
- Three updated Prototypes to be Fabricated by Dec03/Jan04 in support of DT/OT
- Initial Application Up-Armored HMWWV
- R&D partially funded
- Production not funded
- Current system weight is 395

CAPABILITIES

- Provide A Remote Vehicle Mounting System For Machine Guns (MK19 GMG, .50 Cal M2, M240B, M249 And XM307).
- Permits Under Armor Operation Of Existing And Future Crew Served Weapons.
- HTI Potential For Current And Future Platforms

CROWS Firing on the Move
